Hotels and Restaurants Trade Show
Displays and Booths
As well as other areas of Public Assembly

INSURANCE PREMIUM REDUCTIONS

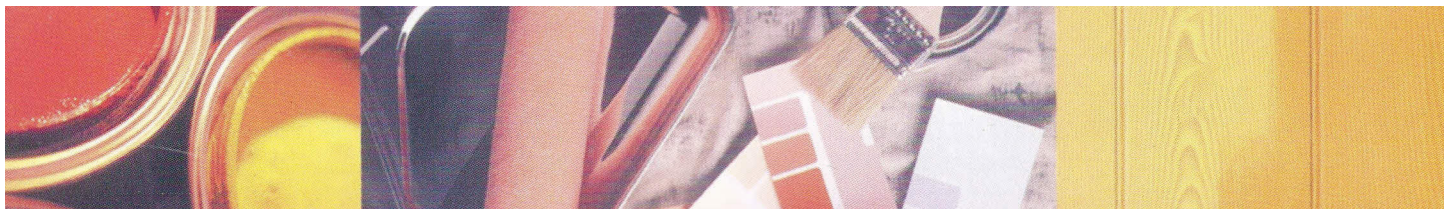

Fire Stop Complies with Federal, State and Municipal Fire Codes. They block flame and heat penetration through their intumescent and synergistic flame suppression action. On contact with flame or excessive heat, our coatings decompose and intumesce, forming a thick dense foam layer that retards flame spread and heat penetration. Our tintable intumescent coatings, available with low, semi or high gloss over coats, are easily applied by brush, roller or spray to maintain fire resistance. These products have been developed for interior or exterior applications.

Ideal for:

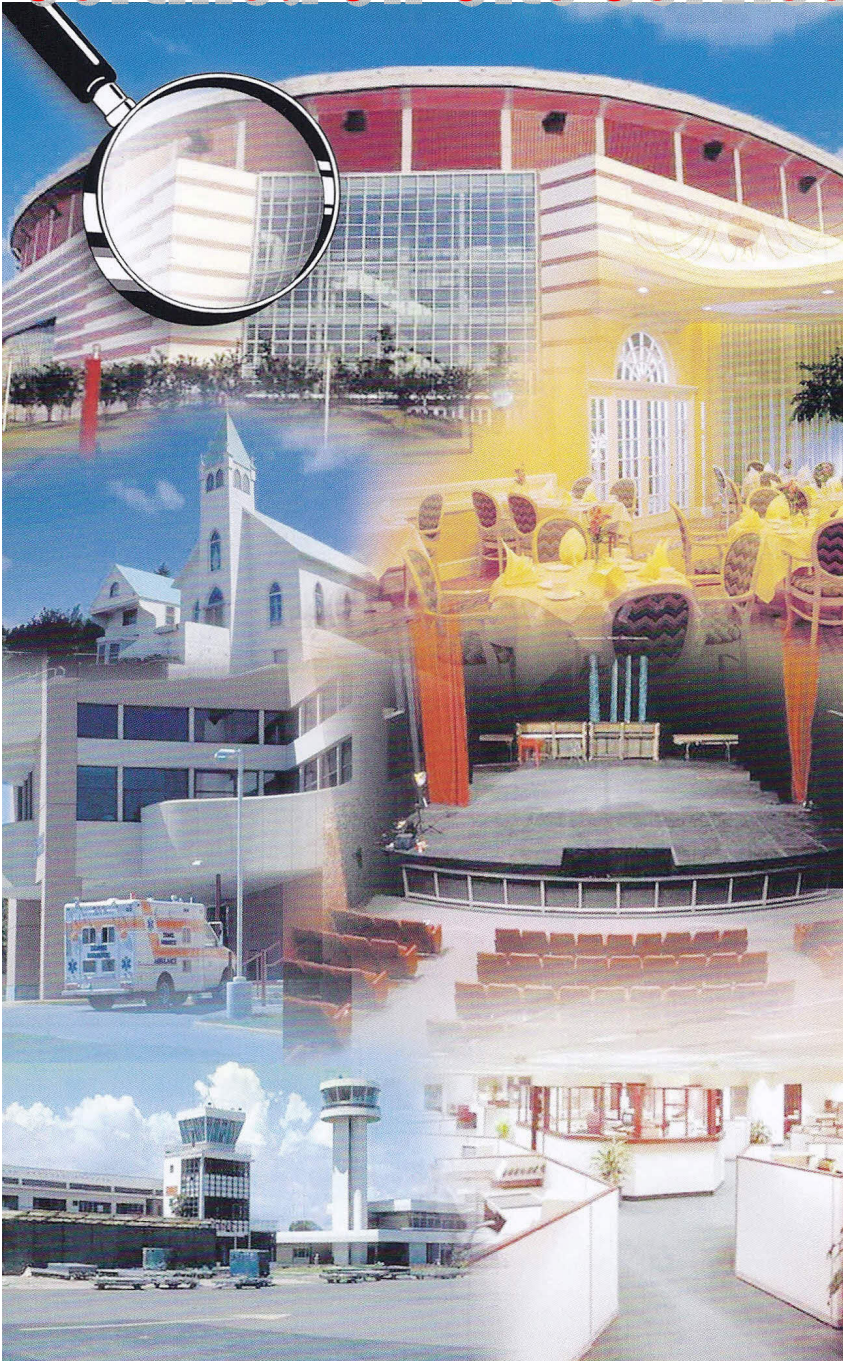

Roofs, decks, ceiling tiles, stairways and halls, wall board, paneling and other surfaces requiring class "A" fire protection and lasting beauty.

Available in:

Gallons, Pails, and Drums

Certified On-Site Service

Certified "On-Site" Fire Stop Services

We have been assisting commercial facilities

In meeting fire and safety codes throughout North America.

Fire Stop offers a variety of ON-SITE Services that

Include cleaning, flame retarding and certification services for

Your facility's public assembly areas. Our Certified Technicians

Are available for large volume contracts or on an emergency

Basis for on-site fire Stop needs. We service your materials

"On-site", quickly, economically and professionally without

The down time of off-site service any time, night or day,

Seven days a week

Fire Stop is a versatile, broad spectrum, colorless, odorless, multi-use, penetrating, class "A" fire retardant. Our pre-mixed product is easy to use, non-toxic, non-allergenic and offers superior fire retardant protection. UL classified Fire Stop assures a quality controlled, invisible fire retardant for economical commercial treatment of natural and synthetic fibers and wooden building materials. Independent testing standards have proven that Fire Stop provides unsurpassed fire-retardant protection and has been recognized by Fire Code Officials across the United States. Coverage rates shall be followed as recommended by the manufacturer and which have been established through independent recognized testing facilities and UL test criteria guidelines.

Ideal for:

Textiles, lumber, wood products, upholstery, carpeting, draperies, decorative products, paper, displays, stage curtains, mattresses and more.

Available in:

Quarts, Gallons, Drums and self-application kits
